BARR'S "PURE" GRASS SEEDS

Produce Beautiful Lawns, Tennis and Cricket Grounds, Public Parks, Pleasure Grounds, etc. Sow in September.

The following mixtures of Grass Seeds are all thoroughly cleaned, and cannot fail to give the greatest satisfaction. There is neither Clover nor coarse grasses in the mixtures.

To ensure a fine lawn, free from weeds and coarse grasses, it is most important that the soil to be sown should be quite clean, that is, free from the seeds of objectionable plants, and the grass seeds used should consist solely of the fine-leaved dwarf-growing grasses.

In sowing grass seeds always take advantage of rainy or damp weather, and after sowing, give a slight covering of clean finely-riddled soil; this, followed by rolling, will ensure a successful vegetation, and if the grass is frequently mowed and constantly rolled, a fine smooth lawn will be the reward.

No. 1. **Thames Embankment Lawn Grasses.** This special mixture has been very successful on the Thames Embankment, and the various public and private parks and squares around London. It is well adapted for renovating or forming new pleasure grounds, Ornamental Parks, People's Parks, etc., in large towns, and for enclosures, such as Squares, in and about London, and other populous cities. Per lb., 1/3; per 10 lbs., 12/; per 20 lbs., 22/; per 56 lbs. and upwards, at the rate of 1/1 per lb.

No. 2. **Fine Lawn Grass Mixture for Improving Old Lawns or Laying Down New Ones, Croquet Grounds, and Bowling Greens.** In this mixture there is a larger quantity of small grasses than in No. 1, per lb., 1/4; per 10 lbs., 12/9; per 20 lbs., 24/6; per 56 lbs. and upwards, 1/2 per lb.

No. 3. **Extra Fine Lawn Grass Mixture for Improving Old Lawns, or Laying Down New Ones, Croquet Grounds, and Bowling Greens.** This is a specially fine mixture of dwarf growing grasses only, which make a finer, closer, and smoother turf, and does not require to be so often mowed as Nos. 1 and 2; It is specially adapted for select lawns. 1/8 per lb.; per 10 lbs., 15/6; per 20 lbs., 30/; per 56 lbs. and upwards, 1/5 per lb.

No. 4. **Hunter's New Mixture of Dwarf Growing Grasses.** Specially recommended, when an extra fine, smooth lawn is required; the grasses are of the finest leaved kinds, and dwarfest growers, so that in using this seed a great saving is effected in mowing, besides having a perfect lawn. Per lb., 2/; per 10 lbs., 19/; per 20 lbs., 37/; per 56 lbs. and upwards, 1/9 per lb.

Dutch Clover, Fluest White. If Clover is desired, it may be added to the Grass Seeds, at the rate of 3 to 4 lbs. per acre. Per lb. 1/6.

HOW TO DESTROY WEEDS ON LAWNS.

WATSON'S WEED-DESTROYING LAWN-SAND will kill daisies, dandelions, plantains, etc., on Lawns, Croquet Grounds, etc., and is also a good fertilizer for the grass. Fuller particulars will be sent on application. Price for sample canister, 2/6 and 5/6; per 1/2 cwt., 9/6; 1 cwt., 18/-; 1 cwt., 34/-.

BARR & SON,

12 & 13, KING STREET, COVENT GARDEN, LONDON.

SPECIAL NOTICES.

- I. **Quality.**—When the Dutch Bulbs are in flower, we annually make a professional visit to the principal "bulb farms" of Holland to inspect the crops, and our supply of Dutch-grown bulbs is drawn from the healthiest "stocks" of the most reliable growers; we can, therefore, recommend with confidence the bulbs, &c., offered, feeling sure that, if properly treated, they will give great satisfaction.
- II. **Experimental Grounds, Long Ditton Nursery,** five minutes from Surbiton Station, S.W.R. (and close to the New Recreation Grounds). Visitors will find many things of interest and beauty in **Hardy Bulbs, Tubers and Herbaceous Perennial Plants**, at all seasons, but in spring the brilliancy of the bulb fields surpasses all description. From August to April one variety or another of our rare Species of *Crocus* may be seen in flower, and in September and October, the beds are gay with our beautiful Meadow Saffrons.
- III. **Daffodil Catalogue.**—In a separate Catalogue we have arranged some of our Specialties, such as Daffodils, Irises, Double and Single Peonies, Christmas Roses, Lenten Roses, Michaelmas Daisies, Perennial Sunflowers, Phloxes, Day-Lilies, Plantain-Lilies, and many other beautiful Hardy Herbaceous Plants. We trust this separation of the collections we have devoted so many years to in forming, will be found convenient to our customers.
- IV. **Our Collection of Daffodils** is the most complete one ever brought together: embracing not less than 500 species and varieties. It includes the Weardale and Longford Bridge seedlings and hybrids, raised by Messrs. Backhouse and Leeds, which were arranged and named by Mr. Barr, and are now the favourite Daffodils of the period. Since Messrs. Backhouse and Leeds have passed from our midst, Messrs. Nelson, Leichtlin, Rawson and de Graaff, have raised many fine varieties, which are now coming into commerce. These Daffodils are all perfectly hardy, remaining uninjured in the open ground, during the most severe winters; out of doors the different varieties maintain a succession of bloom from February to end of May, and are more decorative and useful for cutting than any other hardy spring flowers. Daffodils are invaluable for pot-culture (three to five bulbs in a 4 or 5-inch pot), treated like the Hyacinth, and, by this means a constant succession of these flowers can be maintained from early in January. For full particulars and directions as to culture of these beautiful hardy spring flowers, see our *Daffodil Catalogue, free on application*.
- V. **Medals, Certificates, &c.**—The Royal Horticultural Society, for many years past, have awarded to us, for our Exhibitions of Beautiful New Daffodils, GOLD MEDALS, SILVER MEDALS, &c., with numerous Votes of Thanks, and many First Class Certificates. At the **Second Great Daffodil Conference** of the R.H.S., held from 15th to 18th April, 1890, our Grand Display of New Daffodils, was awarded the ONLY GOLD MEDAL. Many Medals, Prizes and Certificates have also been awarded to our **Beautiful Hardy Daffodils** by ROYAL BOTANIC SOCIETY, CRYSTAL PALACE COMPANY, ROYAL AQUARIUM COMPANY, etc., at whose large London Spring Shows our Daffodils have been the great centre of attraction.
- VI. **Naming Daffodils.**—It is not always possible for us to give the necessary attention to cut specimens of Daffodils that reach us for naming *during our busy seed season*. Our friends in future will do us a great kindness, to send their specimens to the Daffodil Committee of the Royal Horticultural Society. Dates when the Committee sit will be furnished by the Secretary of the R. H. S., 117, Victoria Street, London, S.W.
- VII. **Cut Daffodil Flowers.**—When in bloom out-of-doors, we are prepared to send cut specimens of our Beautiful New Daffodils, at a low charge, correctly named. *Scale of Charges can be had on application*.
- VIII. **Parcel Post.**—We shall in all cases use the **Parcel Post, when cheapest**, and the articles admit of being packed for safe transmission by "Parcel Post."
- IX. **Carriages by Rail** may be deducted at settlement of account, on orders for Bulbs to any Railway Station in Great Britain, and to all ports on the Irish Coast (except goods coming under Clause XI.).
- X. **Orders, paid in advance.**—If it is necessary to send such by Rail, carriage will be prepaid, if requested, or, if not requested, a liberal equivalent in goods will be added.
- XI. **Returned Empties.**—A small charge is made for these, and if returned within a fortnight, allowance will be made for the same. *Returned empties should invariably have the sender's name on the address label for identification, and notification be sent by post stating date of dispatch and name of Railway Company.*
- XII. **Fruit and Forest Trees, Shrubs, Plants in pots, Soils, Watson's Lawn Sand, Manures, Insecticides, Barr's Cut Flower and Fruit Conveyance Boxes, Barr's Improved Indoor Frames, Barr's Improved Hydropult Garden Engines, etc.**—on these we do not allow carriage.
- XIII. **Five per cent.** may be deducted from accounts if paid within one month from date of invoice.
- XIV. **Post Office Orders and Postal Orders** to be made payable at Post Office, Covent Garden, W.C., or any other Post Office, these and all cheques to be crossed, adding the words "and Co.," or by preference "London and County Bank." Small amounts in a Registered Letter may be remitted in Postage Stamps or coin.

NOTICES TO OUR FOREIGN AND COLONIAL CORRESPONDENTS.

- XV. To insure prompt attention, *orders should be accompanied by a remittance, a draft, or an "order to pay," on a London agent; the remittance being sufficient to cover expense of cases, and also of carriage when the freight is required to be paid in advance.*
- XVI. **SEEDS AND BULBS** can now be despatched in cases to India at the rate of 8d. per lb., through the Indian Parcel Post, or by "Express" at a lower rate.
- XVII. In shipping Bulbs and Plants to India, great care is exercised by us in selecting, preparing, and properly packing the same. Still, there are so many contingencies, that we cannot, in any way, hold ourselves responsible for the condition in which plants or bulbs reach their destination.
- XVIII. Our experience in successfully preparing and shipping Seeds, Bulbs, and Plants to India and the Colonies, extends over a long period.

A FEW SPECIALTIES.

20 Barr's Beautiful Rainbow Mixture of Hyacinths, First Quality. A splendid mixture of Hyacinths. s. d.
The colours are evenly blended, and include red, scarlet, purple, lavender, porcelain, azure-blue, mauve, white, rose, blush, yellow, &c., very effective in flower beds and borders.

BARR'S BEAUTIFUL RAINBOW MIXTURES OF HYACINTHS.

FOR OUT-DOOR CULTURE IN BEDS, BORDERS, ETC.

| | | | | | |
|-----|--|---|-------------------------------|-----------|-----|
| 182 | "BARR'S BEAUTIFUL RAINBOW MIXTURE OF HYACINTHS." | This beautiful mixture of Hyacinths was specially arranged for by our Mr. Barr on the occasion of his visit to one of the large Dutch Bulb Farms. The colours are evenly blended, including red, scarlet, purple, lavender, porcelain, azure-blue, mauve, white, rose, blush, yellow, &c., producing a fine effect in flower beds and borders | 1st size bulbs, per 100, 18/6 | per dozen | 3 |
| 183 | "BARR'S BEAUTIFUL RAINBOW MIXTURE OF HYACINTHS," | for mixed borders, shrubberies, and naturalization | 2nd size bulbs, per 100, 14/6 | per dozen | 2 3 |

POMPON, OR MINIATURE HYACINTHS.

These Miniature Hyacinths can be grown in small glasses, fancy pots, old china bowls, crystal dishes, jardinières, etc., alone or associated with Scilla sibirica, Chionodoxa, Crocus, Snowdrops, Dwarf Tulips, and Daffodils, Iris reticulata, etc., planted in "Barr & Son's Prepared Mixture of Charcoal and Cocoa Fibre" (2s. per peck, 6s. per bushel), the surface being covered with fresh green carpet-moss.

In children's gardens and small flower beds, these Miniature Hyacinths, intermingled with other dwarf spring-flowering bulbs, make a fine display throughout the Spring months.

BULBS FOR EARLY-FORCING.

CULTURE.—Pot the bulbs 3 to 6, or more according to size, in a pot, at intervals during August, September, and October; then place the pots out-of-doors on a bed of ashes, and cover with cocoa-nut fibre a few inches above the top of the pots. There let them remain till the bulbs are well rooted, and have made a little top growth, when the pots should be placed in a moderately warm and moist temperature, water being freely given.

188 Dwarf White Sweet-Scented Early Roman Hyacinth now universally prized in bouquets, and may be had in flower during October, November, and December.

Extra fine bulbs, 16s. per 100; 2s. 6d. per doz. | Good selected bulbs, 13s. 6d. per 100; 2s. per doz.

189 Rosy White Early Roman Hyacinth, flowers from a fortnight to three weeks later than the White Roman Hyacinth. 12s. 6d. per 100, 2s. per doz.

190 Blue Early Roman Hyacinth, flowers from a fortnight to three weeks later than the White Roman Hyacinth. 10s. 6d. per 100; 1s. 6d. per doz.

191 Early Paper White Narcissus, Sweet-Scented. Produces trusses of beautiful snow-white fragrant flowers, and is in bloom with the Roman Hyacinth. 7s. 6d. per 100; 1s. 3d. per doz.

192 " New Large-Flowered, very early and free-flowering, per 100, 10s. 6d.; per doz., 1s. 6d.

193 Early Double Roman Narcissus may be had in flower with the Paper White Narcissus. The blossoms are double white, with orange centre, and are produced in trusses. For bouquets and buttonholes they are greatly valued. 7s. 6d. per 100; 1s. 3d. per doz.

SINGLE DUC VAN THOL TULIPS—

| | | | |
|-----|--|-----|--|
| 194 | Scarlet, edged yellow, 6s. 6d. p. 100; 1s. p. doz. | 197 | Yellow, 15s. per 100; 2s. 3d. per doz. |

200 Double Duc Van Thol Tulip, red and yellow, 4s. 6d. per 100; per doz. 9d.

201 Sweet-Scented Single Jonquils, extra strong bulbs, per 100, 7s. 6d.; per doz., 1s. 3d.

202 Sweet-Scented Double Jonquils, " " 15s.; " " 2s. 6d.

203 Chionodoxa Lucilie (The Glory of the Snow), very beautiful deep azure-blue, with white centre, very dwarf. Extra strong home-grown bulbs, per 100, 10s. 6d.; per doz. 1s. 6d.

204 " Sardensis, intense true dark blue, with small glittering white centre, very dwarf.

205 " gigantea, soft lavender-blue, with white centre, large flowers, dwarf habit; very beautiful.

206 Puschkinia libanotica compacta, beautiful erect dwarf trusses of white Scilla-like flowers, deeply shaded and striped blue, strongest bulbs, per 100, 21s.; per doz. 3s. 6d.

207 Scilla sibirica, flowers intense rich blue, very dwarf, extra strong bulbs, 3s. 6d. per 100; 8d. per doz.

208 Elwes' Giant Single Snowdrop, strong home-grown bulbs, 10s. 6d. per 100; 1s. 6d. per doz.

209 Iris reticulata (violet-scented), intense violet-blue, blotched golden-yellow, large bulbs, 7/6 per doz.

210 Iris Persica (violet-scented), white, inlaid with blue, purple, and gold, 15s. per 100; 2s. 6d. per doz.

~~62~~ Barr's Prepared Mixture of Charcoal and Cocoa Fibre is recommended when Bulbs are grown in sitting rooms, 2s. per peck; 6s. per bushel. See directions for use, page 33.

[Barr and Son,

BARR'S CHOICE NAMED HYACINTHS.

FOR CULTURE IN GLASSES, JARDINETS, POTS, AND FOR EXHIBITION.

* The * indicates the single-flowering and semi-double varieties ; these we specially recommend for early forcing in pots, and for growing in glasses, jardinet, &c.

The † denotes varieties with double flowers. These are not so suitable for growing in glasses and jardinet, or for forcing. The double varieties enumerated are a selection of the finest in cultivation, and we should recommend them to be grown in pots.

CULTURE.—Immediately the Hyacinth is potted, which may be done from September to December, *place the pots out of doors on a bed of ashes*, and cover with six inches of the same material, but a covering of cocoa fibre is preferable if it can be had ; then the bulbs should remain exposed to all weathers until the pots are full of roots, and the tops are sprouted about an inch, which will be in about eight or ten weeks after potting. A portion may then be removed indoors, and if forced, this should be done gently in a moist atmosphere, and the bulbs be plentifully watered at the roots. To maintain a succession, remove indoors a portion once a fortnight. If finely developed trusses and rich colours are preferred to very early flowers, the Hyacinth should not be forced, but when brought indoors be placed on the shelf of a greenhouse, in a sitting-room window, or in a cold frame, close to the glass, always in the most genial and sunniest situation at command, and the plants allowed to develop their flowers gradually and naturally, *water being given regularly and freely*, as it is well known to professional cultivators that *failures*, for the most part with Hyacinths, arise from allowing the *soil to become dry*. A abundance of air is necessary, and a moderately *moist atmosphere* ; a dry atmosphere and a draughty situation cause the flower buds to shrivel.

If the Hyacinth is grown in glasses, the *base of the bulb should just touch the water*, and a little charcoal be placed in the glass to keep the water sweet. It is, however, preferable to fill the glasses with the prepared *Mixture of Charcoal and Cocoa Fibre* (see page 33 for directions). Place the glasses in a room *without a fire*, or, better still, in the shady part of a greenhouse, and when the plants have filled the glasses with roots, and have made a little top growth, then place them in the sunniest situation at command, till the flower spikes are well developed ; the glasses may then be removed to where the flowers are to be enjoyed. *Avoid a dry atmosphere or draughty situation*, as these conditions often cause the flower buds to shrivel.

When cultivated in jardinet, the Hyacinth may be associated with other early-flowering bulbs, such as Chionodoxas, Scilla sibirica, Tulips, Snowdrops, Crocuses, Narcissi, Iris reticulata, &c. *Barr & Son's prepared Mixture of "Charcoal and Cocoa Fibre"* should invariably be used (see page 33 for directions) ; the preparation must always be kept moist, and when the jardinet is removed to the sitting-room the surface should be covered with fresh green carpet moss.

BARR'S CHOICE NAMED HYACINTHS.

The varieties of Hyacinths described, and included in the selections offered, are those which Mr. Barr has personally selected during his many visits of inspection to the bulb farms of Holland, and which, from experience, have proved the most worthy of cultivation.

When an order is given for any of the under-mentioned "Selections," if not otherwise instructed, we shall include a proportion of double varieties.

| yellow, large handsome truss | 2 6 |

BARR'S BEAUTIFUL HARDY DAFFODILS (Narcissi).

Bulbs Supplied September to end of December.

In a separate catalogue, the descriptive list of Daffodils will be found, re-arranged into two lists. The First List embraces only the high class and distinct varieties. The Second List includes all the cheap kinds, of which we have large stocks, and these are offered at greatly reduced prices, to encourage extensive naturalization, and as they are all beautiful sorts, we recommend them also for filling flower beds, and "boxing-up" to force for cut flowers.

In the Daffodil Catalogue, we have arranged our grand collections of Irises, Lilies, Paeonias, Hellebores, Michaelmas Daisies, Perennial Sunflowers, Phloxes, Plantain-Lilies, Day-Lilies, etc., with a comprehensive list of the best Hardy Herbaceous Perennials, for decoration of flower borders, shrubberies, large beds, and to cut for table bouquets, etc.

NOTE Naming cut specimens of Daffodils, see Paragraph VI., Special Notices, page 2.

NOTE Supplying Cut Specimen flowers of Daffodils, correctly named, see Paragraph VII., Special Notices, page 2.

The Daffodil is the most beautiful of all hardy Spring flowers, and the most popular; it has for centuries adorned our gardens, and withstood uninjured our severest winters.

For filling beds and planting in groups in mixed borders and shrubberies, no flowers of spring can compare with the Daffodil, and when naturalized in woodland walks, or forming large groups in grass, or planted on sloping banks, the effect Daffodils produce is splendid.

For edgings the dwarf Daffodils are gems. For culture under glass, in pots, the Daffodil ranks with the Hyacinth, and when 3 to 6 bulbs are grown in a pot, the effect is very fine. As a cut flower the Daffodil is unsurpassed, and greatly in demand.

NOTE Daffodil Seed in mixture, for Autumn-sowing, saved from our magnificent collection, p. packet, 1s. & 2s. 6d.

SELECTIONS.

For names and descriptions, see Daffodil Catalogue.

BARR'S HIGH-CLASS AND DISTINCT HARDY DAFFODILS.—From No. 1 List.

The varieties embraced in these assortments consist largely of the fine hybrids and varieties raised by Mr. William Backhouse and Mr. Edward Leeds; they are all distinct one from the other, so that buyers cannot fail to be fully satisfied with them. They may be used for pot-culture or forced for cut flowers. Being hardy they are suitable to plant in flower beds and borders, in the grass, or to naturalize in orchards, etc.

POLYANTHUS, OR BUNCH-FLOWERED NARCISSI,

FOR POT-CULTURE, FLOWER BEDS, BORDERS, RUSTIC BASKETS, FLOWER BOXES, ETC.

The Polyanthus Narcissus has rich golden-yellow or snow-white sweet-scented flowers, and is specially adapted for winter and spring decoration in pots and jardinières. The effect is greatly enhanced when three bulbs are grown together in a 6 or 7-inch pot. The culture is the same as that of the Hyacinth.

Where flowers are in demand in November, December, and early in January, the Paper White and Double Roman Narcissi are invaluable. Pot them early in autumn, and when well rooted commence forcing as required. Thus treated, these and the Roman Hyacinths (see page 6), can be had in bloom from November.

NOTE The Polyanthus Narcissus is a very effective plant in flower beds and mixed borders.

SWEET-SCENTED JONQUILS.

The Double and Single Jonquils are prized for their graceful sweet-scented flowers. For indoor decoration, three to six should be grown in a 4 or 5-inch pot, and cultivated the same as the Hyacinth.

| | per doz. | | per doz. | | | | |

THE TULIP.

The Tulip is extremely hardy, and of easy culture, flowering as freely in the shade as in the sunshine, and producing as fine flowers in a confined town garden, as in more favoured places. Double and single Tulips, when associated together and planted in front of shrubs, maintain a longer display, than if either are separately planted. In gardens where the flower beds must be kept gay from the earliest dawn of Spring, plant between the lines of Tulips, Scilla sibirica, Chionodoxa lucilæ, Snowdrops, or Crocus, and as these flower first, they can be removed or cut down when the Tulip is coming into bloom.

EARLY SINGLE TULIPS.

The Single Tulip has a greater variety of rich, delicate, and attractive colours than any other section of spring-flowering bulbs. Those only who have massed the different varieties, planting the bulbs 5 inches apart, can form an idea of their beauty and great diversity in shade and colour, and the grand effect they produce grouped in flower beds or borders. The Single Tulip is extensively grown for indoor decoration, three or five bulbs in a pot, and cultivated in the same way as the Hyacinth. (See page 7 for cultural directions.)

The varieties of the Early Duc Van Thol Tulip, Nos. 429 to 434, flower together, and are of the same height, which renders them valuable for beds and borders, where an early Spring display is required, also for forming designs. For early-forcing, to bloom with the Roman Hyacinth and Double Roman and Paper White Narcissi, they are greatly valued.

SINGLE TULIPS, SELECT VARIETIES, FOR OUT-DOOR CULTURE, OR FOR POTS INDOORS.

DOUBLE TULIPS.

Double Tulips have massive flowers of brilliant, diversified, and beautiful colours, and are suitable for beds on the lawn, terrace, etc., also as edgings to Rose beds and shrubberies. Planted in groups of three or more in flower and shrubbery borders, they are very effective.

For sectional lines, where the Single Tulip is planted in designs, the Tournesol, No. 487, is most valuable; it is also the best to force for early-flowering, and is extensively grown for Covent Garden Market. Imperator Rubrorum is the best scarlet, and Tournesol Yellow the best of the yellows. For indoor decoration, the Double-Tulip should be planted three bulbs in a pot, and receive the same cultural treatment as the Hyacinth. For beds or masses, Rex Rubrorum, scarlet, is the best to associate with La Candeur, white, and, so arranged, the effect is unrivalled amongst Spring flowers. Plant the bulbs six inches apart.

CROCUSES.

The Crocus is one of the earliest flowers of Spring, and occupies a prominent place in every garden. When planted as an edging in triple lines of one or more colours, the effect is striking. No Spring display surpasses that of broad wavy bands of golden-yellow, striped, purple, or of pure white Crocuses, when they expand their blossoms in February and March. In lawns and pleasure parks, planted in the grass, the Crocuses is extremely effective. For several years past in "Kotten Row," and other of the Royal Parks, Crocus, Snowdrops, Daffodils, &c., have been planted in the grass, to the great delight of visitors, and the enhanced decoration of the parks. In wild gardens, woodland walks, etc., the Crocus should be associated with the violet, the primrose, and the oxlip.

CHEAP DUTCH CROCUS, FOR LARGE PLANTINGS.

To encourage extensive planting in shrubberies, woodlands, wild gardens, in grass, on lawns, pleasure parks, etc., Crocus are quoted by the thousand cheaply. For a gorgeous effect in early spring nothing can equal the Golden Yellow Crocus, masses of which will attract the eye at a great distance.

CHOICE NAMED LARGE-FLOWERED DUTCH CROCUS. Large Roots.

The following large-flowered named Crocuses are recommended for planting in groups, edgings, select beds, and in designs. There are purples and blues of shades, pure whites, rich yellow, light and dark, striped sorts, &c. When the crocus is grown in pots, plant thickly, and treat as recommended for the cultivation of the Hyacinth in doors on page 7. When removed from under the ashes, place in an airy situation, and give water very freely.

BARR AND SON'S SELECTIONS.

CHOICE AND RARE SPECIES OF CROCUS.

Autumn, Winter, and Spring-Flowering.

These beautiful Crocuses are mostly wild species, collected by George Maw, Esq., in Greece, Syria, and Palestine, etc., and will be very acceptable to cultivators of hardy flowers, especially those that flower in Autumn and Winter, forming, as they do, a connecting link between the bulbous plants of Summer and those of Spring. At our Nurseries, Long Ditton, we have one or other of these Crocuses in bloom from September to April. On rockwork their flowers are seen to great advantage.

A Descriptive List of Autumn, Winter and Spring-flowering Species of Crocus, may be had free on application.

SNOWDROP (*Galanthus Nivalis*).

In the early Spring months, there is nothing more beautiful than a sheet of the snowy graceful blossoms of the Snowdrop. In planting an edging, mass, or a bed, whether under the turf of the lawn or in the flower garden, the bulbs should almost touch each other. A bed of surpassing beauty may be arranged, Snowdrops in the centre, with a deep fringe of bright blue *Scilla sibirica*, or *Chionodoxa Lucilae* or *Sardensis*; a charming effect is also produced by intermingling in the proportions of two-thirds Snowdrops to one-third *Scilla sibirica* or *Chionodoxa Lucilae* or *Sardensis*. When practicable such plantings of the Snowdrop should be permanent, and the surface of the soil in Summer, top dressed and sown with annuals, such as *Nemophila*, *Leptosiphon rosea*, etc., or planted with surface rooting bedding plants. The Snowdrop and the Crocus when planted in alternate circles are very effective, and follow each other so closely, that no gap is left in the succession.

In beds of Tulips and Hyacinths, Snowdrops are very effective between the lines; they flower while these bulbs are just moving the surface, and when the flowers are over there remains an elegant groundwork of green foliage.

The Snowdrop is most generally used as a permanent edging, and in masses, or in the fringes of lawns, where the grass need not be cut till May, and in pleasure parks, nestling in the grass it looks charming. In planting, the turf need not be disturbed, but holes five inches deep should be made with a dibber, dropping two inches of fresh soil, then three or more bulbs, keeping the holes about three inches apart. Snowdrops when planted on banks and grass slopes, look lovely. *The New Giant Single Snowdrop, Galanthus Elwesii*, should be extensively used, the flowers being large and most valuable for cutting. The *Chionodoxa Lucilae* and *Sardensis* are charming companions to Elwes' Giant Snowdrop; both are found wild together, and as nature is never found out of harmony, the information may be suggestive to those who follow natural arrangements in their garden.

SNOWDROPS—continued.

570 *Galanthus Elwesii* (Elwes' Giant Single Snowdrop), a distinct and beautiful species from the mountains near Smyrna, the largest and most handsome of all Snowdrops. It has large pure white globular segments, with rich emerald-green and white tube; when first opening, the shape of the flower reminds one of the *Fuchsia globosa* in form, although much larger.

573 .. *latifolius*, white, a very distinct species, with broad, light green foliage..... " 5s. 6d. 0 6

WINTER ACONITE.

Early in Spring the golden blossoms of the Winter Aconite, resting on its emerald-green cushion of leaves are very beautiful and effective, especially when associated with Snowdrops, Scillas, Chionodoxas, *Anemone fulgens* and *Apennina*, etc. The green carpet of foliage remains long after the flowers, and thus makes the plant valuable, especially in situations where it is difficult to clothe the ground, such as under trees, and in moist situations, which the Winter Aconite enjoys, and where few other flowering plants will thrive. It may also be naturalized in grass, with great effect.

574 Winter Aconite, per doz. 6d.; per 100, 2s. 6d.; per 1000, 21s.; extra fine roots, per doz. 8d.; per 100, 3s. 6d.; per 1000, 30s.

CHIONODOXA (Glory of the Snow).

575 *Chionodoxa Luciliae* (The Glory of the Snow). Mr. George Maw, in describing the circumstances under which he found the *Chionodoxa Luciliae*, says, "At the lower level it was out of flower, but near the summit of the mountain a mass was met with in full splendour, forming one of the most sumptuous displays of floral beauty I ever beheld; a mass of blue and white, resembling *Nemophila insignis* in colour, but more intense and brilliant." The *Chionodoxa Luciliae* was figured in *The Garden*, July 3rd, 1880, and in 1878 the Floral Committee of the R. H. S. awarded to our specimens a First-Class Certificate. Amongst the imported bulbs will be found a small percentage of a beautiful dark variety of *Scilla bifolia*; the two plants grow together, and although great care is taken to separate them, a few of the *Scillas* still remain, but in very small proportion.

Imported bulbs, strong selected, per 1000, 35s.; per 100, 4s. 6d.; per doz., 9d.

576 *Chionodoxa Luciliae*, home-grown bulbs, recommended specially for mingling with early forced bulbs in pots, jardinets, etc.

Selected bulbs, 1st size, per 1000, 63s.; per 100, 7s. 6d.; per doz., 1s. 3d.

577 *Chionodoxa sardensis*, introduced by us in 1883. A First-Class Certificate was awarded to our plants, 1885, by the R. H. S., also by the Royal Botanic Society. *The Garden* of 14th March, 1885, writes:—

"*Chionodoxa sardensis* is a gem among spring bulbs—one of the rare really blue flowers. Compared with *C. Luciliae* . . . it is much brighter and deeper in colour, and a good sized patch is strikingly brilliant, the petals are coloured nearly to the centre. . . . Must become a great favourite." The deep gentian blue is rendered still more striking by a small glittering white centre. For distant effect this species cannot be too highly recommended.

Imported bulbs, strong selected, per 1000, 35s.; per 100, 4s. 6d.; per doz., 9d.

578 *Chionodoxa sardensis*, home-grown bulbs, specially recommended for mingling with early forced bulbs in pots, jardinets, etc.

Selected bulbs, 1st size, per 1000, 63s.; per 100, 7s. 6d.; per doz., 1s. 3d.

2nd " " 45s.; " 5s. 6d.; " 1s.

579 *Chionodoxa Tmolusii* (new 1889). The flowers of this fine new species resemble those of *C. Luciliae*, but the blue colouring is more intense, and the white centre larger and more striking. It has a dwarfer habit, and blooms more freely than *C. Luciliae*. Selected Imported Bulbs, per 100, 15s.; per doz. 2s. 6d.

580 *Chionodoxa gigantea* (new 1889). A very distinct and beautiful species. The flowers are twice the size of *C. Luciliae*, more open, and of a beautiful soft lavender blue, with white centre. The habit is neat, dwarf, and robust. This is, indeed, a valuable acquisition to our Spring flowers.

Selected Imported Bulbs, per 100, 18s.; per doz., 3s.

Selected Home-grown bulbs, per 100, 30s.; per doz., 4s. 6d.

SNOWFLAKES (*Leucojum*).

SPRING, SUMMER, AND AUTUMN-FLOWERING.

Leucojum vernum, the Spring Snowflake, is one of our earliest Spring flowers with blossoms resembling a large Snowdrop, handsome in outline, and prized for bouquets. *L. Aestivum* and *Hernandezii*, the Summer Snowflakes, flower in April and May, and are remarkable for their elegant blossoms, which so closely resemble a Snowdrop as not to be distinguishable from it when used in bouquets. *L. Autumnale* is a charming neat graceful white, tipped pink Snowdrop-like flower, blooming in August and September. *L. trichophyllum* resembles *Autumnale* in its graceful growth, but the flowers are pure white and are produced in spring; this is a very rare plant, and is figured in *Bot. Register*, vol. vii., page 544.

each—s. d.

581 *Autumnale* (*Acis Autumnalis*), white and pink flowers in autumn, graceful in pots and on rockwork, etc., ½ ft. per doz., 3s. 6d. 0 4

582 *Trichophyllum*, var. *grandiflorum* (*Acis trichophylla*), pure white, a rare and beautiful spring-flowering species; re-introduced by A. W. Tait, Esq. per doz., 15s. 1 6

583 *Aestivum*, elegant drooping white flowers, in early summer, 1½ ft. per 100, 7s. 6d.; per doz., 1s. 3d. 0 3

584 *Hernandezii* (syn. *Pulchellum*), an elegant early summer-flowering species, with drooping white flowers, 1½ ft. per doz., 3s. 6d. 0 4

585 *Vernum*, pretty white flowers, in early spring; invaluable for edgings and masses, or for naturalizing in grass, etc., or on rockwork Selected Bulbs, per 100, 6s. 6d.; per doz., 1s. od. 0 3

586 .. *carpathicum*, considered by many finer than the type per 100, 21s.; per doz., 3s. 6d. 0 4

SCILLAS, Early-Flowering.

The effect in early Spring can hardly be over-estimated of the intense rich blue of *Scilla sibirica*, and the beautiful ultramarine-blue of *Scilla bifolia*, contrasting with the snow-white of the Snowdrop, and the varied hues of the Crocus. As permanent edgings these two early-flowering Scillas are most valuable. Grown in pots or jardinettes, alone, or with other bulbs, they form a pleasing variety amongst indoor plants. In flower beds and masses, the blossoms are so abundantly produced as to carpet the ground. *Bifolia* is the first in bloom, and is closely followed by *Sibirica*.

SCILLAS, May-Flowering (Wood Hyacinths).

The Wood Hyacinth is the most decorative of May-flowering bulbs. Our native species, *Scilla nutans* abounds in most parts of the country, and many suppose it to be the "Culver keys" referred to by Izaak Walton. The fine Spanish varieties (*S. campanulata*) of the Wood Hyacinth which we offer, have erect flower spikes and are much larger and handsomer than our native plants, which have drooping flower spikes. All the Wood Hyacinths are very effective in flower and shrubbery borders, and most valuable for wild gardens, woodland walks, and to naturalize. They also make charming pot-plants, and may be forced into bloom by March. The white varieties are greatly in demand to cut for table bouquets and vases.

PUSCHKINIA.

This beautiful variety of Puschkinia is a first-class dwarf hardy April-flowering bulb, and should be represented in every garden; on rockwork it is charming, and is also found a valuable pot-plant (6 bulbs in a pot) under glass. A coloured plate of it appeared in *The Garden*, 1878 and 1881.

MUSCARI.

M. botryoides, the *Grape Hyacinth*, has a neat dwarf compact growth, with flower spikes of dark blue, clear pearl-blue, bluish, or pure white. It is an admirable plant for edgings to permanent beds, and beautiful under glass, 6 bulbs in a pot. *M. neglectum*, the *Starch Hyacinth*, is in bloom with *M. botryoides*, but differs in having a larger flower spike and the foliage being recumbent. *M. moschatum*, the *Musk-Hyacinth*, and its varieties have delightfully fragrant flowers, and are recommended for pot-culture. *M. plumosum monstrosum*, the plume-like appearance of its handsome flowers has secured to it the name *Feathered Hyacinth*; it is the last in this section to flower, and deserves a place in every flower border and rockery. The *Muscari*, like the Wood Hyacinth, is a fine plant for naturalization, continues long in bloom, and is not particular as to soil or situation.

LILY OF THE VALLEY. *For forcing, and making plantations out-of-doors.*

The clumps of Lily of the Valley quoted, have been specially prepared, and cannot fail to give abundance of flowers. In potting, the top of the crowns should be one inch below the rim of the pot; *tight potting* is of great importance, and care should be taken, in the first watering, that the moisture penetrates to the *centre of the clump*. Prepared crowns are now extensively used by the growers for Covent Garden Market, who put 20 to 30 in a 5-inch pot. The *Berlin crowns* are best for very early work; the *Devonshire crowns* like being forced slowly. The prepared clumps we think will be found by private growers preferable to crowns. The supply of *Extra Selected clumps* being limited, orders should be booked early for *dispatch in November*.

CULTURE.—A *moist atmosphere and abundance of water* is indispensable to success in forcing Lily of the Valley; therefore, to encourage simultaneously the development of flower and foliage, most growers place the pots in a shady damp part of the house, or invert a flower-pot over the crowns, till the flower and the foliage have made some progress, then they are removed to a less shady situation. If they are grown in a dry atmosphere, or get an *insufficient supply of moisture*, the crowns, technically speaking, "go blind."

DIELYTRA (LYRE FLOWERS). *For forcing or planting out.*

The most elegant of all forced plants for conservatory and room decoration, also to cut for furnishing vases. The graceful pendant branches are loaded with beautiful red heart-shaped flowers, and furnished with the most delicate rich green foliage. In shrubberies or herbaceous borders, few plants in summer are so attractive as the Lyre Flower.

SPIRÆA (THE MEADOW SWEET). *For forcing, or planting out.*

The large graceful, feathery, pure white, fragrant flowers of *Spiræa japonica* surpass all else in this way to cut for furnishing vases, and the plant is one of the most decorative for the conservatory and room. In forcing, a *moist atmosphere and abundance of water* is necessary. *Spiræa palmata* has feathery clusters of lovely rosy crimson blossoms, which for vases are greatly prized. *Spiræa japonica* fol. *aureo-reticulatis* is a most handsome and ornamental plant, forces as easily as *S. japonica*. In sheltered moist borders out of doors, these plants are very decorative.

For other Species of *Spiræas*, see PLANT CATALOGUE.

IRISES.

The Iris is the "Orchid" of the flower garden; its blossoms are the most rich and varied in colour of hardy plants. It should be extensively planted in flower and shrubbery borders, and naturalized in wild gardens. As a cut-flower the Iris is invaluable, competing in richness and variety of colour with the choicest and the most beautiful Orchids. A judicious selection of Iris should include not only the rich colours and the aesthetic combinations of colours but such varieties that will ensure a succession from Christmas to August, and this is achieved at an outlay not exceeding the cost of one specimen Orchid. A selection can be made from the various bulbous and tuberous-rooted species on page 18, which will give a succession of bloom from early winter to early Spring, when the graceful flowers of the *Iris pumila*, and other Dwarf Flag Irises, begin to open. Close after these follows the *Barbata* group of Flag Irises, with an almost endless variation in colour, from white and the richest golden-yellow, to rose, intense purple, pale blue and beautiful bronzes. The Beardless Flag Iris Species continue the succession in *Sibirica*, *Orientalis*, *Graminea*, *Versicolor*, *Virginica*, etc.; and are succeeded in July by the clematis-flowered Japanese Iris *Kämpferi*. The Spanish bulbous Iris flowers in June, and is followed by the English bulbous Iris; thus the succession, in conjunction with *I. Kämpferi*, is carried to August, the close of the Iris season. Amongst the various species offered on page 18, and the various Beardless Flag Irises, offered in our Plant Catalogues, are many of great beauty flowering at intermediate seasons, and thus forming links in an unbroken chain.

To cut for filling vases and for table bouquets, all the Iris are admirably adapted, and when necessary to forward the flowers to a distance, gather the buds just before expanding, and, like the Gladioli, they will open in water. The effect is greatly enhanced when the individual blossoms are arranged in wet sand or moss.

ENGLISH IRIS (THE LARGE FLOWRED BULBOUS IRIS OF THE PYRENEES).

Bulbs supplied September to December.

These magnificent Irises thrive best in a well-drained light soil; when planted in heavy soil, surround the bulbs with sand. When convenient plant as soon after the beginning of September as possible, although we have planted late as December, and even in January; but the earlier the planting is done the better. The varieties offered have been specially selected from some of the largest and best collections, as being most distinct, and they are as strikingly beautiful and varied in colour as the most sumptuous orchids of the hot-house.

Our annual exhibit of cut flowers of this grand Iris at the London Summer Shows, are always greatly admired by all.

SPANISH IRIS (THE ORCHID-LIKE BULBOUS IRIS OF SPAIN)

Bulbs supplied September to December

The Spanish Irises are in flower a fortnight before the English, and differ from them considerably, the flowers being smaller, and the combination of colours quite different; both in form and the curious blendings of shades, the flowers have a strong resemblance to orchids. To cut for vases and bouquets they are greatly prized. They require the same cultural treatment as the English Iris. See coloured plate in *The Garden*, 1881.

Our annual exhibits of cut blooms of these beautiful Irises, at the London Summer Shows, are always a great feature of attraction.

VARIOUS BEAUTIFUL BULBOUS AND TUBEROUS-ROOTED IRIS SPECIES.

These Iris Species are all hardy and beautiful, flowering variously from November to June. The dwarf early species would be enjoyed more if planted on rockwork, where their flowers will not get damaged so much by heavy rains. *Alata*, *Histro*, and *Vartani*, are charming winter-flowering species, and are followed in February by the *Reticulata* varieties, with their lovely violet-scented blossoms, the sweet-scented *Persica*, also the beautiful new species *Rosenbachiana*, *Bakeriana*, and *Bornmülleri*. Next in succession come the interesting and charming *Caucasica*, *Orchoides*, the curious Snakeshead Iris *Tuberosa*, and the new species *Sindjarensis*. These are followed closely by *Susiana* and *Iberica*, etc., with their beautifully netted, large, handsome blooms. The two new varieties of *Iberica* are remarkably handsome. These, with *Iris Gatesii*, *Suvorowi*, and *Susiana* surpass in beauty any written description that can be given of them. The charming dwarf Iris *Arenaria* with its small bright yellow flowers, and the pretty Peacock Iris, *Pavonia*, and Iris *Bloudovii*, flower in May, and are followed in June by *Iris Juncea*, *Boissieri*, *Lusitanica*, and *Lusitanica sordida*, all species of striking beauty and interest. *Iris Iberica*, and its varieties, *Susiana*, *Arenaria*, *Gatesii*, and *Suvorowi*, require special treatment; Dr. Foster grows these beautiful Iris successfully, planted out, and covered with a frame from the middle of June to the middle of October, thus securing to them a period of rest; from October till in flower, the lights are removed, and the plants exposed to all weathers. From a very small space, Dr. Foster cuts multitudes of flowers of the finest quality from these, and other kindred species, by this simple treatment.

| | | each—s. d. |
|-----|---|-----------------|
| 714 | <i>Alata</i> , flowers pale blue of similar shape to <i>I. reticulata</i> , winter-flowering, ht. $\frac{1}{2}$ ft. | p. doz. 7/6 0 9 |
| 715 | <i>Arenaria</i> , a rare and beautiful dwarf species, with canary-yellow flowers in May, ht. 1 ft. | 2 6 |
| 716 | <i>Bakeriana</i> (new), a most lovely and striking species, flowers of similar form to <i>I. reticulata</i> , <i>S. sky-blue</i> , <i>F. white</i> , heavily blotched and spotted rich dark violet, sweet-scented, flowers February and March, $\frac{1}{2}$ ft. Figured and described in "The Garden," May, 1890. | 4 6 |
| 717 | <i>Bloudovii</i> (new), a pretty species from Central Asia, bearing in May attractive soft yellow flowers, ht. 9 to 12 in. | 2 6 |
| 718 | <i>Boissieri</i> (new), <i>S.</i> and <i>F.</i> rich purple, with a golden-yellow blotch, June-flowering, a very handsome species, ht. 9 in. | 2 6 |
| 719 | <i>Bornmülleri</i> , a lovely little dwarf species, with bright golden-yellow flowers, spotted brown, in February, charming on rockwork, ht. 3 in. Figured and described in "The Garden," May, 1890. | 3 6 |
| 720 | <i>Caucasica</i> , primrose-coloured flowers, with silver-margined foliage, $\frac{1}{2}$ ft. | 2 6 |
| 721 | <i>Gatesii</i> (new), a hardy robust species of the <i>Susiana</i> character, but flowers much larger, of a beautiful satiny creamy white, delicately veined and minutely spotted silvery-grey, May-flowering, $2\frac{1}{2}$ ft. | 10 6 |
| 722 | <i>Histro</i> , a charming species from Palestine, bright blue, blotched golden-yellow, in the way of <i>I. Reticulata</i> , but much earlier. | 2 6 |
| 723 | <i>Iberica</i> , a dwarf species of great beauty, with large handsome flowers, <i>S.</i> satiny-white, <i>reticulated</i> dark purple, <i>F.</i> rich brown-purple, with conspicuous black blotch, ht. 6 in. per doz. 10/6 | 1 0 |
| 724 | " <i>Heylandiana</i> (new), this handsome variety is much darker than <i>Iberica</i> , the markings running so close as to give the whole flower a coppery maroon appearance, ht. 8 in. to 10 in. | 7 6 |
| 725 | " <i>Van Houtteana</i> (new), of similar colour but more floriferous than <i>Iberica</i> , and flowers sometimes attaining double the size, ht. 8 in. to 10 in. | 7 6 |
| 726 | <i>Juncea</i> , <i>S.</i> and <i>F.</i> brilliant golden-yellow, one of the most beautiful and showy of bulbous Irises. To cut for vases it is invaluable. It prefers a rather dry and warm light soil. per doz. 55. 6d. | 0 6 |
| 727 | <i>Lupina</i> (The Wolf's Fur Iris), a remarkable, striking, new species, with curious greenish yellow flowers, veined brownish red, resembling a wolf's fur, ht. $\frac{1}{2}$ ft. | 7 6 |
| 728 | <i>Lusitanica</i> , <i>S.</i> yellow, <i>F.</i> rich yellow with orange blotch, handsome, ht. $1\frac{1}{2}$ ft. per doz. 3/6 | 0 4 |
| 729 | <i>Lusitanica sordida</i> (Thunderbolt Iris), <i>S.</i> chestnut-brown, <i>F.</i> bronze-purple, with rich golden blotch, handsome, ht. $1\frac{1}{2}$ ft. per 100. 21/; per doz. 3/6 | 0 4 |
| 730 | <i>Orchoides</i> (new), this species resembles <i>I. caucasica</i> , but flowers are larger and of a bright golden-yellow colour, being produced in the axils of the leaves, April-flowering, 1 ft. | 3 6 |
| 731 | <i>Pavonia major</i> (Peacock Iris), pure white, petals blotched clear celestial blue, for pots or the open ground, 1 ft. | per doz. 1/6 |
| 732 | <i>Persica</i> , white, suffused pale blue, the petals blotched purple and gold, very fragrant, $\frac{1}{2}$ ft. This Iris prefers a warm, light, and dry soil. | per doz. 2/6 |
| 733 | " <i>purpurea</i> (new), this differs from the type in the flowers being of a purple colour. | 0 3 |
| 734 | <i>Reticulata</i> , very beautiful, brilliant deep violet, blotched golden-yellow, strongly violet-scented, $\frac{3}{4}$ ft. Figured in "The Garden," 1881. per doz. 55. 6d. and 75. 6d. | 0 9 |
| 735 | " <i>cyanæa</i> , <i>S.</i> sky-blue, <i>F.</i> dark blue, dwarf and free-flowering. | 5 6 |
| 736 | " <i>major</i> (new), a splendid variety of similar colour to <i>Reticulata</i> , but considerably larger and broader in the flower, very handsome, 1 ft. | 5 6 |
| 737 | " <i>Krolagei</i> , red-purple, blotched golden-yellow, violet-scented, $\frac{3}{4}$ ft. per doz. 75. 6d. | 0 9 |
| 738 | " <i>Nelsoni</i> (new), flowers varying from beautiful pale blue to bright blue, $\frac{3}{4}$ ft. | 5 6 |
| 739 | <i>Rosenbachiana</i> (new), sweet-scented flowers generally white and rosy-violet, but varying a little, in way of <i>I. Persica</i> , but larger, quite hardy, very early, and beautiful, $\frac{1}{2}$ ft. First-class Certificate R. H. S. and Bot. Society, 1889. | 5 6 |
| 740 | <i>Sindjarensis</i> (new), a charming new species from Mesopotamia, resembling <i>I. caucasica</i> in form and growth; the flowers are white and azure-blue, prettily crested, and produced in succession from the axils of the leaves, March-flowering, 1 ft. | 5 6 |
| 741 | <i>Susiana</i> , a remarkably handsome species with immense flowers, blush tinted brown and covered with a network of dark lines, ht. 1 ft. | per doz. 7/6 |
| 742 | <i>Suvorowi</i> , a fine Iris of the <i>Iberica</i> class, but more hardy, <i>S.</i> and <i>F.</i> varying from red-purple to lavender, or grey, conspicuously reticulated with deep veins. | per doz. 25/ |
| 743 | <i>Tuberosa</i> (Snakeshead Iris), very striking, flowers rich velvety violet-black and green, ht. $\frac{3}{4}$ ft. | per doz. 2/6 |
| 744 | <i>Vaga</i> var. <i>Leichtlini</i> , <i>S.</i> pale blue, shading to chestnut-brown, <i>F.</i> same colour, reticulated at base white and brown. Very handsome. | 7 6 |
| 745 | <i>Vartani</i> . A new species from Palestine, found growing near Nazareth, flowers pale azure, of <i>I. Reticulata</i> form, but flowering in November or December, $\frac{1}{2}$ ft. | 3 6 |

BEAUTIFUL FLAG IRISES.

FLAG IRIS BARBATA, THE BEARDED FLAG IRIS, COMMONLY CALLED GERMAN IRIS.
Our collection of Bearded Flag Irises is the largest and most complete in Europe.

DWARF FLAG IRISES, INCLUDING PUMILA, OLBIENSIS, Etc.

Charming Flag Irises, growing 6 to 12 inches high, and flowering during March, April, and May.

IRIS KÄMPFERI (the Clematis-flowered Japanese Flag Iris).

The magnificence of these splendid new Japanese Iris, surpasses all description.

BEARDLESS SPECIES OF FLAG IRIS.

Many of these beautiful species make grand aquatics, while others may be grown as marsh aquatics.

For Descriptive List of the above-named Irises, with cultural directions and general information, see Daffodil Catalogue, free on application.

IXIAS, MORPHIXIAS, SPARAXIS, TRITONIAS, AND BABIANAS.

CULTURE IN-DOORS.—From September to December plant in a four or five-inch pot five or six bulbs, using a compost of turf loam, leaf soil, and silver sand. Make the soil firm about the bulbs, then plunge the pots in ashes in a cold pit or frame, and withhold water till the plants appear, then at first give sparingly. Except during wet or frosty weather, the lights should be left off. Early in February, the plants having made sufficient growth, remove them to the greenhouse, close to the glass, and carefully attend to the watering.

CULTURE OUT-DOORS.—Plant from October to January, at a depth of three to four inches, and two to three inches apart, in a prepared light loamy soil, thoroughly drained, the bed raised six inches above the general level, with a due south aspect. Should the earlier plantings make foliage in autumn, protection must be given during severe frost, and this is best done by hooping the beds over, and, when necessary, covering with mats; or tiffany may be used, and can remain on till the danger from severe frost has passed. The plantings made in December and January need no protection beyond a little fern, which gradually removes in spring, as the plants spear through it; as these late plantings will flower later in summer than the earlier ones, select a situation for them where the sun's rays will be somewhat broken, and the blooming period will thereby be prolonged.

IXIAS.

The Ixia is a slender graceful growing plant, with long loose spikes of bloom. The colours are rich, varied, and beautiful, the centre always differing in colour from the other parts of the flower, so that the blossoms expanding in the sun's rays, present a picture of gorgeous beauty.

TRITONIAS, BABIANAS, AND THE RANUNCULUS.

TRITONIAS.

The habit and growth of these resemble the Sparaxis, but the prevailing colours differ, and flowering later, they form a most important succession. The colours range from *buff* to *rose* and the *richest glowing orange*, the flowers always having a beautiful transparency. For pot-culture they are most valuable. At Cliveden, the late Mr. Fleming was in the habit of growing hundreds of pots of *Crocata* for furnishing jardincts.

BABIANAS.

The flowers of the Babiana range in colour from *blue* to the *richest crimson-magenta*, and set off by a *dark green* *hirsute* *foliage*, they form a striking contrast both in flower and foliage to the Sparaxis and Tritonia. The Babiana has the same fine dwarf compact growth, and is a good companion plant to the Sparaxis and Tritonia, in pots or out of doors.

THE RANUNCULUS.

CULTURE.—Plant the *Turban Ranunculus* from October to March, and the *Persian* varieties from January to April. When the soil works kindly, and the day is dry, draw drills two inches deep, and five or six inches apart; at the bottom of the drill sprinkle a little sand, press the tubers firmly into the soil, claws downwards, and cover with sand, then with soil, keeping the crown of the tuber two inches under the surface. During severe weather, cover the early plantings with dry litter, leaves, or old tan, and this remove before the foliage in Spring gets injured. In April and May, during dry weather, water the beds freely, if necessary two or three times a week; and when the flower-buds appear, water if required daily, and continue doing so while the plants are blooming, *taking every care to wet the foliage as little as possible*.

DOUBLE PERSIAN RANUNCULUS FOR BEDS, RIBBONS, AND MASSES.

The named varieties have been selected on account of their large flowers and fine colours.

DOUBLE TURBAN OR TURKISH RANUNCULUS.

The flowers of the *Turban Ranunculus* differ from the *Persian* in being larger, more rose-like, and self-coloured. In beds, ribbons, and masses, the rich yellow, bright orange, brilliant scarlet, and pure white flowers, are very effective in Spring.

NEW LARGE-FLOWERING TURCO-PERSIAN RANUNCULUS.

This new race of Ranunculus is remarkable for a vigorous growth, and is profusely floriferous; the plants attain a height of about 18 inches, and produce from 10 to 15 blossoms each. Where cut flowers are in demand, these new Ranunculus are most valuable, as flowers may be gathered from the same bed several times a week, during the flowering period, without impairing the display.

THE ANEMONE, OR WINDFLOWER.

For brilliancy of colour few flowers can compare with the *Anemone*, which produces in Spring its masses of blooms, double or single, in an endless variety of dazzling *scarlets*, *crimson*, *roses*, *blushes*, and *snow-whites*, also *lilacs*, *blues*, and *purples*, all of which for cutting are invaluable, lasting long in water. In addition to its gorgeous flowers, the *Anemone* has a light and elegant fern-like foliage, and a neat dwarf habit. For beds, edgings, and masses, where Spring flowers are grown it is matchless, and may be had in bloom, weather permitting, from November to July, according to situation, locality, and time of planting.

CULTURE.—Any good soil, moderately well drained, suits the *Anemone*. In its native habitat it grows mostly in vineyards and oliveyards, where it is partially protected from the sun's rays and parching winds, the most potent enemies of Spring flowers. Plant in succession from August to May, the roots four to six inches apart, at a depth of two to three inches, and when the ground is in good working condition, on a dry day. *The plantings for Summer and Autumn-flowering, must be in a situation where the ground is moist, and in shade from after 10 or 11 a.m.*

NEW DOUBLE POPPY ANEMONES, FOR BEDS AND MASSES.

The flowers of the Double Poppy *Anemone* resemble a semi-double Hollyhock, and are extremely handsome. When planted from September to December, they flower in succession during the early Spring months, and those planted from January to April flower in succession from April to July.

NEW VARIETIES OF ANEMONE CORONARIA.

| | |
|---|--|
| 900 Anemone coronaria, "Glory of the South" (new). This is a grand new <i>Anemone</i> . The flowers are single and very large, with broad petals of a brilliant and rich scarlet, and a rich blue-black central boss. A flower of great beauty and fine substance. Imported Roots, per 1000, 63/-; per 100, 7/6; per doz., 1/3. | |
| 901 Anemone coronaria, "St. Brigid," a very lovely strain of <i>Anemones</i> . The flowers are very large, some single, and others semi-double, and the colours are most brilliant and varied, there being both self-colours and beautiful streaks and mottles. All flowers show a handsome blue-black central boss. They have a graceful habit, and are remarkably free-flowering, per 100, 15/-; per doz., 2/6. | |

ANEMONE STELLATA (THE STARRY WINDFLOWER OF THE RIVIERA).

These Starry-flowered Single *Anemones* are remarkable for variety of brilliant colours, elegant flowers, and graceful foliage. A light well-drained soil and warm sheltered situation suits them best, and on rock work they are charming. They also make good pot-plants with six roots in a pot.

King Street, Covent Garden, 1890.]

ANEMONES—continued.

ANEMONE FULGENS (Scarlet Windflower) AND ITS VARIETIES.

These are the hardiest and most free flowering of all Anemones, and the colours are the richest and most brilliant. They commence flowering from early Spring, and are greatly valued for cutting, as the blooms last a considerable time fresh in water. The fresh-coloured fern-like foliage is exceedingly graceful, and considerably adds to the beauty of the plant. Masses of these Anemones in the Spring garden produce an effect that for brilliancy and richness of colour is unsurpassed.

If the roots are planted early, flowers may be gathered from Christmas, and, by successional plantings, made from August to May, a continued display is maintained till late in autumn. *The plantings made for summer and autumn-flowering must be in a situation where in summer the ground is moist, and in shade, from after 10 or 11 a.m.*

SUNDY ANEMONES.

Anemone apennina, the blue Mountain Windflower forms a dense cushion of rich blue, and is one of the loveliest dwarf Spring flowers. *A. blanda* resembles *A. apennina*, but flowers a month earlier. The varieties of *Anemone nemorosa* are most charming, and no flower border should be without its clumps of these, as they literally carpet the ground with their neat flowers. *A. nemorosa Robinsoniana* is remarkably beautiful, and *Anemone nemorosa bracteata* may be called "the Jack in the Green" of Anemones, the white petals resting on a profusion of green bracts. *A. Pulsatilla* flowers spring and autumn, and makes a charming rock-plant. All the above-named species are charming on rockwork. *A. rivularis* is a very ornamental spring-flowering variety. As pot-plants these Anemones are very charming. *A. japonica*, white, rose and red, are the most decorative of Autumn-flowering herbaceous plants.

CYCLAMEN.

CYCLAMEN PERSICUM (Greenhouse varieties).

From November to March, *Cyclamen persicum* is brought in large quantities to Covent Garden Market, many of the specimens having upwards of two hundred flowers, and realizing high prices. This Cyclamen is an indispensable plant for indoor decoration, and few flowers are more highly prized for button-hole bouquets, ladies' dresses, and finger-glasses. It may be cultivated in a cool greenhouse, or cold frame, with a little winter protection; but it is in a temperature of 45° to 60° the Covent Garden growers produce their fine plants, and these are mostly from seed sown in November, and not allowed to go to rest till they have flowered the following winter.

935 *Cyclamen persicum*, very fine varieties for Greenhouse decoration, per doz., according to size, 15s., 21s., 25s., and 30s.; each, 1s. 6d., 2s., 2s. 6d., and 3s. 6d. Larger specimens, each, 5s. 6d., 7s. 6d., 10s. 6d., 12s. 6d., 15s., and 21s. Plants in flower can be supplied from December at market prices.

936 *Cyclamen persicum*, giganteum varieties, each, 2s. 6d., 3s. 6d., to 5s. 6d.

937 " grandiflorum varieties, each, 2s. 6d., 3s. 6d., to 5s. 6d.

938 Seed from Large Flowered Prize Varieties of *Cyclamen persicum*, 2s. 6d. and 3s. 6d. per packet. Seedling plants, when properly cultivated, make fine specimens in 12 to 15 months.

CYCLAMEN, HARDY SPECIES, for Rockwork out-of-doors.

All the Hardy Cyclamen are European; they require perfect drainage, and shelter from the cutting winds of March and April, and the hot rays of the Summer sun; at the bottom of old walls and on rockwork they are very beautiful; or nesting in the grass, near the roots and under the shelter of old trees, the effect is most charming. *C. Europaeum* (roots from the open ground, 25/- per 100) commences flowering in July, [Barr and Son,

HARDY CYCLAMEN—continued.

and the blossoms are very fragrant, the varieties of *C. Hederaefolium*, in Autumn, and have beautiful *Ibericum*, and *Coum*, which bloom from December to March; *Repandum* and *Vernum* close the Cyclamen, season in April, and as these two are Italian species, they should be planted in sheltered nooks on rockwork, and protected with leaves till March.

The *Cyclamen hederifolium* varieties, with their beautiful *Anoectochilus*-like variegated leaves, are unusually decorative throughout Autumn and Spring, and often have we felt surprised that not more advantage has been taken of these for Winter beds, intermingling with them for succession *Scilla bifolia*, *Scilla sibirica*, *Chionodoxas*, *Leucojum vernum*, *Narcissus nanus*, *Snowdrops*, *Muscaris*, &c.

These hardy *Cyclamen* are kept in pots ready for despatch at all seasons, *C. Europaeum*, at 25s. per 100, are lifted from the bed out of doors as wanted.

939 Hardy Cyclamen, Autumn, Winter, and Spring-flowering, 12 varieties, 3 roots of each, 30s.

HYACINTHUS CANDICANS.

THE GREAT SNOW-WHITE SUMMER-FLOWERING HYACINTH.

955 *Hyacinthus Candicans*, attains a height of 3 to 6 feet, according to soil and situation, and is surrounded with 20 to 50 graceful pendant pure white bell-shaped flowers, equally decorative for the flower border in summer or the conservatory. Figured in *The Gardener*, 1881.

GLADIOLI.

EARLY-FLOWERING HARDY GLADIOLI, for Autumn-Planting.

Bulbs ready from October.

These beautiful Early-flowering Gladioli are greatly prized as cut flowers in July, and on this account should be largely planted, as also for the fine effect they produce in the flower garden. *G. Colvillei*, "The Bride," is exceptionally valuable, and is extensively grown in pots to cut during April, May and June for Covent Garden Market. All these may be grown in pots for indoor decoration, or to cut for filling vases, etc.

CULTURE.—A sunny situation is preferred. Trench the ground, working in plenty of rotten manure in the underspout; plant the varieties of *Colvillei*, *Cardinalis*, and *Byzantinus* from the beginning of October, and the others from November till March, at a depth of six inches. If the summer is dry and the weather hot, a good soaking of water or liquid manure twice a week greatly benefits the growing plants. When planted in autumn, if the winter is severe, the beds should be lightly covered with fern or cocoafibre.

CULTURE FOR CONSERVATORY DECORATION.—Plant three to five, according to the size of root, in a five or six-inch pot, and plunge in ashes in a cold frame or pit, and withhold water till the bulbs have started into growth; or, the pots may be buried in ashes out of doors, as recommended for the Hyacinth, and there allowed to remain undisturbed till ready to remove indoors. It is customary with some to plant several bulbs close together in the open border, and when the flower begins to colour, lift without breaking the ball, pot, and place indoors. So treated, the flowers expand as if the bulbs had not been disturbed.

BEAUTIFUL NEW HARDY HYBRID GLADIOLI.

A very beautiful race of Hybrid Gladioli, the result of crossing the Natal species *G. Purpureo-auratus* (see *Gladioli*, Cape species) with the best types of *Gladiolus Gandavensis*. The flowers are very distinct, both in form and markings, from any other section of *Gladioli*, and all are vigorous in growth and quite hardy.

We enumerate a few of the most beautiful.

A FEW RARE AND BEAUTIFUL SPECIES OF CAPE GLADIOLI.

The species of *Gladiolus* offered below we feel sure will be acceptable to lovers of bulbous plants. With the exception of *Purpureo-auratus*, *Rosens*, *Sulphurens*, *Tristis*, and *Xanthospilos*, which are hardy, they should be grown under a south wall, or during winter protected with a frame or handlight, or grown as pots plants under glass.

| 1024 | Ringens, bright orange and yellow flowers | 1 0 |
| 1025 | Roseus, tall spikes of pretty bright rose flowers | 1 0 |
| 1026 | Saundersii, handsome spikes of bright salmon-scarlet flowers, lower petals white, spotted scarlet, very showy, 2 ft. | 1 0 |

CAPE SPECIES OF GLADIOLI—continued.

| | | each—s. d. |
|------|---|------------------|
| 1027 | Sulphureus, fine spike of flowers, canary-yellow, spring-flowering, 3 ft. | 1 0 |
| 1028 | Tenellus, a dwarf species, with curious reddish brown and yellow flowers, very fragrant, June-flowering, 3 ft. | 1 0 |
| 1029 | Tristis, graceful drooping spikes of large greenish-white flowers, which have a delightful perfume at evening. In vases it is exceedingly attractive, and lasts long in water | per doz. 7/6 0 9 |
| 1030 | Watsonianus, flowers bright scarlet, produced in March | 1 0 |
| 1031 | Xanthosiphilus, rose, very fine | 1 0 |

AMARYLLIS.

Under this heading are arranged plants, differing very much in character, and requiring separate treatment.

THE GUERNSEY AND BELLADONNA LILIES.

The Guernsey and Belladonna Lilies are received by us in bud early in September. The supply being always uncertain, orders for them should be given as soon as possible after the 1st, and not later than the 15th September. When executing orders for the Guernsey and Belladonna Lilies, we carefully examine the flower-buds, and send only such plants as give promise of good flowers. Delay in transit, neglecting to plant immediately, or, perhaps, an undeveloped defect in the flower bud, often leads to partial failure, and as we cannot hold ourselves responsible for such contingencies, purchasers are recommended to buy an extra quantity, as the roots are so very inexpensive.

CULTURE.—Immediately the Guernsey and Belladonna Lilies are received, pot them in light soil, prepared cocoa-fibre or moss, and give water liberally. Bulbs of Guernsey Lilies, purchased after the flowering season, should be potted and grown under glass. Bulbs of Belladonna Lilies may be planted under a south wall at a depth of one foot, and when established will flower annually.

| | | each |
|------|---|------------------------|
| 1032 | Belladonna Lily (Amaryllis belladonna), produces umbels of large white flowers, shaded and tipped deep rose | per doz. 9/- each 1 0 |
| 1033 | Guernsey Lily (Nerine sarniensis), flowers brilliant scarlet, having the appearance, when seen with the sun's rays on them, of being spangled with gold | per doz. 10/- each 1 0 |

HARDY AMARYLLIS.

Amaryllis Candida (Zephyranthes) "The Flower of the West Wind," throws up in autumn a profusion of white Crocus-like flowers. Lutea (Sternbergia), "The Lily of the Field," is also a good hardy bulb, for edgings and groups, its rich golden-yellow Crocus-like flowers, expanding in Autumn from the midst of a bright fresh green foliage. The varieties of Amaryllis Longifolia (Crinum) produce, late in Summer, large umbels of beautiful funnel-shaped sweet-scented blossoms, and being perfectly hardy, are admirable to plant in mixed flower borders.

| | | per doz. each. |
|------|--|-------------------------|
| 1034 | Candida (Zephyranthes), white, valuable as an edging, and beautiful in groups | per 100, 10/- 1 6...0 3 |
| 1035 | Lutea (Sternbergia), bright golden-yellow crocus-like flowers, produced in Autumn, valuable as an edging, and beautiful in groups and masses | per 100, 10/- 1 6...0 3 |
| 1036 | Longifolia alba (Crinum capense album), white, a grand border plant, 2½ ft. | ... 1 6 |
| 1037 | " rosea (" " roseum), rose " | 2½ ft. 7 6...0 9 |
| 1038 | " pallida (" " pallidum), rosy-white " | 2½ ft. 10 6...1 0 |

VALLOTA PURPUREA, AND THE JACOBEA LILIES.

Vallota purpurea, known also as "The Scarborough Lily," is most valuable as an Autumn-flowering plant, and as a cut flower for filling vases. We recommend it to be planted out of doors in May, and when in bud potted up for conservatory decoration. Amaryllis formosissima, the Jacobea Lily and its variety Glaucia, are quaintly-shaped beautiful flowers, they force well, and should be potted in succession for Spring decoration. In April and May the dry bulbs can be bedded out or planted in the flower borders for Summer-flowering.

| | | each |
|------|---|-----------------------|
| 1039 | Vallota purpurea (The Scarborough Lily), large handsome bright scarlet flowers in umbels. Established in pots, 15s., 21s. & 30s. per doz.; 1s. 6d., 2s. 6d. & | 3 6 |
| 1040 | Amaryllis formosissima (The Jacobea Lily), rich dark crimson | per doz., 5s. 6d. 0 6 |
| 1041 | " " glauca, bright crimson-scarlet, very striking | per doz., 5s. 6d. 0 6 |

CHOICE GREENHOUSE AMARYLLIS.

These are grand plants in the conservatory, and to cut for table bouquets and vases. With management, these magnificent Amaryllis may be had in bloom for many months. The unnamed seedlings offered we specially recommend; they are from the most advanced collection in Europe, and cannot fail to please, both as regards variety of colour and beauty of flower. The bulbs are large, full grown, and ready to flower.

CULTURE.—Immediately after potting, place in a moist temperature, and, if convenient, plunge the pot to the rim in a gentle, steady, moist bottom heat; thus treated, a vigorous leaf growth is produced, and a large umbel of flowers secured.

1042 CHOICE UNNAMED SEEDLING AMARYLLIS. Purchasers cannot fail to have amongst these, flowers of great beauty. The bulbs are full grown, and will all flower per dozen, 25s.; each, 2s. 6d.

NEW AND CHOICE VARIETIES OF AMARYLLIS FROM THE FAMOUS LEIDEN COLLECTION.

| | | | | | | |

| 1045 | 12 in 12 beautiful new varieties | 10 10 | 1048 | Splendid mixed varieties, per doz. 30/-, each 3/6 | | |

THE LILUM.

THE LILY is matchless amongst hardy plants for variety of colour, chasteness, and beauty of form. It is an important plant to associate in beds with Rhododendrons, Peonias, Double Pyrethrums, and Herbaceous plants. As a pot-plant the Lily is a general favourite.

1049 LILUM AURATUM (The White Golden-rayed Crimson-spotted Hill Lily of Japan). This is, indeed, the Queen of Lilies, and should have a place in every garden and conservatory. It is of simple culture and perfectly hardy. Out-of-doors it should be planted 9 in. to 12 in. deep in good fibrous loam.

Strong English-grown Bulbs, ready in October, 1/6, 2/6, and 3/6 each; 15/-, 21/-, and 30/- per doz.

| | | | |

|------|--|---|--|------------|
| 1052 | LILUM CANDIDUM (The Snow-White Madonna, or Common White Garden Lily), quite hardy. height 4 to 5 feet | per 100, 15s.; per doz., 2s. 6d. | | |
| 1053 | " " | extra large bulbs, per 100, 21s.; per doz., 3s. 6d. | | |
| 1054 | " LONGIFLORUM HARRISII (The Bermuda or Easter Lily), a very beautiful and graceful Lily, with long handsome snow-white fragrant flowers of elegant form. Invaluable for early forcing, and for greenhouse or border decoration | per doz. 10s. 6d. and 15s.; each, 1s. & 1s. 6d. | | |

For general descriptive list of Lilies, and cultural directions, etc., see Daffodil Catalogue.

HELLEBOROUS OR CHRISTMAS AND LENTEN ROSES.

Plants supplied from October to March.

Christmas and Lenten Roses are hardy winter-flowering plants, covered with blossoms at a period of the year when plants in flower out-doors are a rarity. In this family there is much variety, both in flower and foliage, and established plants in flower borders and on rockwork, and as pot-plants, are highly decorative.

For descriptions of varieties and cultural directions, see Daffodil Catalogue.

HARDY HERBACEOUS PÆONIAS.

Plants supplied from October to March.

HARDY JUNE-FLOWERING CHINESE DOUBLE PÆONIAS.

These noble plants compete favourably, in general effect, with the finest hybrid Rhododendrons, whether it be in variety of tint, diversity of colour, profusion or duration of bloom. With these qualities combined to a handsome, massive foliage, accommodating habit, and easy culture, you have a plant to occupy the place of, or to associate with, the Rhododendron. These Pæonias succeed in any ordinary garden soil, and are equally adapted to intermingle with shrubs, or to take their place amongst herbaceous plants in flower borders and wild gardens.

For descriptions of varieties and cultural directions, see Daffodil Catalogue.

HARDY SPECIES AND VARIETIES OF SINGLE PÆONIAS.

The beautiful species and varieties of Single Pæonias offered are new to gardens, and we recommend them as fine border plants, possessing considerable character and diversity, in foliage, and habit of growth; some are tall with a fine bold outline, others dwarf and bushy; some have very large poppy-like flowers; others, flowers not unlike water-lilies.

For descriptions of varieties and cultural directions, see Daffodil Catalogue.

HARDY HERBACEOUS EUROPEAN DOUBLE PÆONIAS.

Plants supplied from October to March.

The Pæonias enumerated under this heading are very old inhabitants of our gardens, but at the present day are not so generally known as their merits deserve. Few flowers in May equal in brilliancy of colour, the old Double Red Pæony. The Double Rose is exquisitely beautiful, and the Double White, when in bud, presents the most delicate pink colour. The Anemone-flowered, like the Cactus Dahlia, has unequal petals, and is very attractive.

Cultural treatment the same as for the Chinese Pæonias.

| | | |
|------|--|---|
| 1071 | Double Red Pæony, rich crimson, very large flowers abundantly produced | per doz. each |
| 1072 | Double Rose Pæony, flowers open full rose and pass off flesh colour, large and fine | x. d.—s. d. |
| 1073 | Double White Pæony, flowers open pale pink and pass off pure white, large and fine | 15 0...1 6 |
| 1074 | Double Anemone-flowered Pæony, large rich crimson, petals somewhat irregular, an aesthetically shaped flower | These are varieties of P. officinalis, and flower in May. |

[Barr and Son,

PART II.

DESCRIPTIVE LIST ALPHABETICALLY ARRANGED, OF VARIOUS BULBS AND TUBEROUS-ROOTED PLANTS.

Those marked thus * ripen late and will be ready to send out from the middle of October to March. All other bulbs, etc., are ready for despatch from 1st September. Orders which embrace later ripening bulbs, etc., will be executed in two parts, carrying forward those not ready for delivery, till they are safe to move.

ED* The height of the plants is given in feet and inches. In most cases cultural notes are added.

each—s. d.

| | | | | |
|--------|---|------------------|---|-----|
| 1075 * | <i>Abobora viridiflora</i> , an elegant hardy summer climber, with miniature scarlet fruits | | 1 | 0 |
| 1076 * | <i>Achimenes</i> 25 beautiful varieties, 1 root each, 10/6; 3 roots each, 25 varieties, 30/- | | | |
| 1077 * | 12 beautiful varieties, 1 root each, 4/6; 3 roots each, 12 varieties, 12/6 | | | |
| 1078 | <i>Agapanthus umbellatus</i> (the Blue African Lily), flowers in handsome umbels, half-hardy..... | | 0 | 9 |
| 1079 | <i>maximus</i> , Same colour as above, but with larger flowers | | 1 | 6 |
| 1080 | <i>albus</i> (the White African Lily), flowers in handsome umbels, half-hardy | | 1 | 6 |
| 1081 | <i>variegatus</i> (the variegated African Lily), with silver-margined foliage | | 2 | 6 |
| 1082 | <i>Mooreanus</i> , small blue flowers in umbels, graceful | per doz. 7s. 6d. | 0 | 9/- |

The *Agapanthus* are noble and handsome bulbous plants for pot-culture in greenhouses, or for decoration of terrace walks and lawns.

| | | | | |
|------|---|-------|----|---|
| 1083 | <i>Albuca canaliculata</i> , bearing handsome trusses of green and gold flowers, very fragrant, 1 1/2 ft. | | 1 | 0 |
| 1084 | <i>Neilsoni</i> (new and rare), produces large handsome spikes of white almond-scented flowers, with brown stripe. Under glass it flowers pure white, 3 to 5 ft. | | 21 | 0 |

The *Albuca*s are pretty and curious Cape bulbous plants. They may be grown in the greenhouse, or out of doors, planted under a south wall. Plant September or October.

| | | | | |
|------|---|-------|------------------|---|
| 1085 | <i>Allium acuminatum</i> , a beautiful species, with bright rose-coloured flowers in umbels, 1 ft. p. doz. 5/6 | | 0 | 6 |
| 1086 | <i>aureum</i> (Moly), bright yellow flowers in umbels, 1 ft. per 100, 6/6 | | 11 | 0 |
| 1087 | <i>azureum</i> , handsome intense blue flowers, quite hardy, 1 1/2 ft. | | 7s. 6d. | 0 |
| 1088 | <i>descendens</i> , large dark red-purple flower heads, in compact umbels, 2 ft. | | 3s. 6d. | 0 |
| 1089 | <i>nigrum</i> (magisticum), large umbels of flowers, whitish with black centre; summer-flowering, 3 to 4 ft. | | 3s. 6d. | 0 |
| 1090 | <i>Murrayanum</i> , bright rose-violet flowers, in umbels, 1 ft. per doz. 4s. 6d. | | 0 | 6 |
| 1091 | <i>neapolitanum</i> , white flowers, much used in bouquets, 15 in. per 100, 5/6 | | 1s. | 0 |
| 1092 | <i>Ostrowskianum</i> , (new), a beautiful new species from Asia Minor, with large heads of beautiful rose-coloured flowers | | | |
| 1093 | <i>pedemontanum</i> (syn. <i>narcissiflorum</i>), rose-purple, drooping bell-shaped flowers in clusters, beautiful, 3 ft. | | 0 | 9 |
| 1094 | <i>pulchellum</i> , graceful heads of charming bright rosy-purple flowers, in July | | 5s. 6d. | 0 |
| 1095 | <i>nauum</i> , small canary-yellow flowers in graceful drooping umbels, very charming, July-flowering..... | | 7s. 6d. | 0 |
| 1096 | <i>roseum</i> , most pleasing rosy puce colour, 1 ft. | | per doz. 3s. 6d. | 0 |
| 1097 | <i>triquetrum</i> , flowers white, striped green, in graceful drooping umbels, very pretty, 1 ft. per doz. 3s. 6d. | | 0 | 4 |

All the *Alliums* are hardy and very showy. *A. neapolitanum* is easily forced, and the cut blooms are prized for bouquets.

| | | | | |
|--------|--|-------|--|---|
| 1098 * | <i>Alstroemeria aurea</i> , orange flowers, spotted carmine, valuable as a cut flower p. 100, 21/-; p. doz. 3/6 | | 0 | 4 |
| 1099 * | <i>aurantiaca</i> , flowers similar to <i>A. aurea</i> , but deeper and richer in colour, 15/-; | 2/6 | 0 | 3 |
| 1100 * | <i>haemantha</i> , various, beautiful shades of rose, crimson, orange, buff, and blush, with yellow markings, valuable as a cut flower | | per doz. 5s. 6d. | 0 |
| 1101 * | <i>pelegrina alba</i> , white, very chaste and beautiful flowers | | Plant on a warm south border, or under glass | 5 |
| 1102 * | <i>rosea</i> , rose-coloured flowers, beautifully spotted | | border, or under glass | 6 |
| 1103 * | <i>psittacina</i> , bright crimson flowers splashed green and mahogany, 3 ft. | | per doz. 5s. 6d. | 0 |
| 1104 * | <i>tricolor</i> , charming white and yellow flowers, striped and blotched crimson | | 4s. 6d. | 0 |
| 1105 * | in fine mixture | | 2s. 6d. | 0 |

These beautiful Peruvian Lilies are perfectly hardy (except *Pelegrina*), very easy to cultivate, and most valuable to cut for vases. Plant at a depth of one foot, and by preference close to a wall.

| | | | | |
|--------|---|-------|------------------|---|
| 1106 * | <i>Amorphophallus Rivieri</i> (Umbrella Arum), a very curious and handsome plant, with large palmate leaves, 2 to 3 ft. in diameter, on a white spotted stem; plant out in April or pot earlier, strong bulbs 2 | 0 | 6 | |
| 1107 * | <i>Anomathaea cruenta</i> , a charming dwarf pot-plant, with small bright scarlet, crimson-blotted flowers; elegant for edgings out of doors, 1 ft.; plant in Spring..... per 100, 10s. 6d.; per doz. 1s. 6d. | 0 | 3 | |
| 1108 * | <i>Aplos tuberosa</i> , a rapid growing elegant hardy deciduous climber, for arbours, trellises, &c. p. doz. 5/6 | 0 | 6 | |
| 1109 | <i>Arum cornutum</i> , red flowers, spotted black, stem curiously marbled | | per doz. 3/6 | 0 |
| 1110 | <i>crinitum</i> , flowers reddish brown, and of immense size, stem marbled | | 8/6 | 0 |
| 1111 | <i>dracunculus</i> , large purple-red and black-blue flower, marbled stem, very handsome | | 4/6 | 0 |
| 1112 | <i>italicum</i> , strikingly variegated leaves, flowers greenish white, followed by spikes of bright scarlet berries | | per doz. 3s. 6d. | 0 |

The above-named Arums are all hardy; *Crinum* should be planted by preference on a warm border.

| | | | |
|--------|--|-------|------------------------------------|
| 1113 * | <i>Begonias</i> , large-flowered varieties in colours for Bedding, crimson, scarlet, rose, white, orange, and yellow; each colour separate | | per doz. 9s. ; per 100, 63s. |
| 1114 | choice mixed large-flowered varieties for bedding, p. 100, 35s. & 50s.; p. doz. 5s. 6d. & 7s. 6d. | | |
| 1115 | 6 in 6 named beautiful varieties | | 5s. 6d., 7s. 6d., 10s. 6d., & 15s. |
| 1116 | 12 in 12 named beautiful varieties | | 10s. 6d., 15s. 21s., & 30s. |
| 1117 | double, handsome named varieties | | per doz. 36s., 42s., 63s., & 84s. |
| 1118 | mixed varieties | | per doz. 12s. |

| | | | | | |
|--------|--|-------|--------------|---|---|
| 1119 * | <i>Bessera elegans</i> , a beautiful bulbous plant from Mexico, bearing graceful umbels of drooping bell-shaped, bright scarlet flowers; charming in pots, or on rockwork, 1 ft. Plant out in Spring, or pot earlier | | per doz. 7/6 | 0 | 9 |
| 1120 * | <i>Bletia hyacinthina</i> , a beautiful hardy Chinese orchid, with showy deep rosy-pink flowers; likes a peaty sheltered border, 1 ft. | | | 2 | 6 |

| | | | | | |
|------|--|-------|--------------|---|---|
| 1121 | <i>Bloomeria aurea</i> , beautiful golden flowers in umbels, quite hardy, 1 ft. | | per doz. 4/6 | 0 | 6 |
| | <i>Bobartia aurantiaca</i> . See <i>Homeria</i> . | | | | |

| | | each | s. | d. |
|------|--|-------------------------------------|----|----|
| 1122 | * <i>Bomarea Caldasiana</i> , orange-scarlet, spotted crimson, figured in "The Garden," Aug. 6th, 1881..... | 15 | 0 | |
| 1123 | * " <i>Carderi</i> , a magnificent species, with large clusters of lilac and rosy white flowers..... | 15 | 0 | |
| 1124 | * " <i>oculata</i> , a climbing species, purple-spotted, red flowers in clusters, half-hardy p. doz. 7s. 6d. | 0 | 9 | |
| | The <i>Bomareas</i> are magnificent greenhouse plants, and do best in a compost of equal parts rough sand, turf, loam, and peat. While in growth, manure-water should occasionally be given. | | | |
| 1125 | * <i>Boussingaultia baselloides</i> , an elegant climber and a valuable plant for hanging baskets, window boxes, rustic tubs, etc., leaves pale green and fleshy, hardy on dry rockwork.....per doz. 4s. 6d. | 0 | 6 | |
| 1126 | * <i>Bravos geminiflora</i> , long racemes of orange-scarlet pendant flowers; a good pot-plant and hardy, 1½ ft.per doz. 5s. 6d. | 0 | 6 | |
| 1127 | <i>Brodiaea Bridgesi</i> , large heads of beautiful sky-blue flowers, 1 ft. | 0 | 6 | |

| aut-doors in spring for summer decoration. | |
| 1332 * <i>Rigidella immaculata</i> , a beautiful Mexican bulbous plant, flowers brilliant orange-scarlet, in June, very showy, $\frac{1}{2}$ ft., same culture as for <i>Tigridias</i> | per doz. 2s. 2 6 |
| 1333 <i>Romulea speciosa</i> , rich deep carmine, $\frac{1}{2}$ ft., graceful hardy plants, with fine grassy foliage, and numerous flowers, charming on rockwork. | p. 100, 5s/6; p. doz. 1/- ... |
| 1334 " <i>bulbosa</i> , large light purple, flowers, charming on rockwork. | 10/- 1 0 |
| 1335 <i>Salvia patens</i> , brilliant deep blue flowers, very beautiful, 3 ft. | per doz. 5s. 6d. 0 6 |
| 1336 " <i>alba</i> , beautiful pure white flowers, 3 ft. | 1/- 1 0 |
| These <i>Salvias</i> may be planted out during summer, but should be potted up and kept in the conservatory during winter, where they will continue to bloom. <i>S. patens</i> is the most brilliant of all blue flowers. | |
| 1337 <i>Sanguinaria canadensis</i> , white flowers in spring, borne above the coltsfoot-like leaves, truly charming; plant in moist peaty soils and shady places; perfectly hardy, $\frac{1}{2}$ ft. | per doz. 4/- 0 6 |
| 1338 <i>Schizostylis coccinea</i> , rich scarlet Gladioli-like flowers in spikes. Quite hardy. It delights in a sheltered situation, amongst trees and shrubs. Established masses listed in Autumn and potted, flower freely under glass for months, $\frac{1}{2}$ ft. | strong tufts, per 100, 30s.; per doz. 4/-; 0 6 |
| Solomon's Seal. See <i>Polygonatum</i> . | |
| 1339 <i>Sparaxis pulcherrima</i> , a remarkable plant, with a dense elegant grassy foliage, from which rise graceful wiry flower stems, 3 to 5 feet high, arching over in a broad graceful curve, from which hang beautiful bell-shaped flowers; quite hardy. Figured in "The Garden," 1888 | 1s. 6d. & 2 6 |
| 1340 * <i>Stenomesson flavum</i> (Coburgia), beautiful yellow flowers, 4 to 5 in. long } Greenhouse bulbs of easy { | 2 6 |
| 1341 " <i>incarnata</i> , beautiful orange-red flowers, 4 to 5 in. long } culture. June-flowering. { | 1 6 |
| 1342 * <i>Tecophilæa cyanocrocus</i> , a most beautiful Chilean spring-flowering bulb, of dwarf growth, bearing large crocus-like deep blue flowers, delicately scented. It makes a charming pot-plant, or can be grown in a warm dry situation on rockwork, or under a south wall. | 2s. 6d. & 3 6 |
| 1343 * <i>Tigridia conchiflora</i> , petals yellow, cup yellow, spotted scarlet, 1 ft. | per doz. 3s. 6d. 0 4 |
| 1344 * " <i>grandiflora rubra</i> , petals rich scarlet, cup spotted crimson on a yellow ground, flowers very large, 1 ft. | per doz. 3s. 6d. 0 4 |
| 1345 * " <i>alba</i> , petals white, cup spotted ruby, exceedingly beautiful, 1 ft. | 1s. 5s. 6d. 0 4 |
| No flower is more gorgeously coloured than the <i>Tigridia</i> . Fine American roots are supplied from December to May, and should not be planted till March, April, or May; for pot-culture, plant earlier. Plantings may be made as late as Midsummer, and if lifted and potted up in September, they will flower under glass late in Autumn. (Beautiful Coloured Plate of <i>T. alba</i> , price 2/-.) | |
| Triteleia. See <i>Milla</i> . | |
| 1346 <i>Tropaeolum azureum</i> , true, a beautiful rare bulb. Flowers rich violet-blue, white centre, very pretty | 3 6 |
| 1347 " <i>brachyceras</i> , a fine yellow-flowered species | 3 6 |
| 1348 " <i>Jarratii</i> , scarlet, orange, and black | per doz. 10s. 6d. 1 0 |
| 1349 " <i>pentaphyllum</i> , red and green, perfectly hardy | 1 6 |
| 1350 " <i>polyphyllum</i> , golden-yellow flowers in long trusses, quite hardy | per doz. 7/-; 9d. & 1 0 |
| 1351 " <i>speciosum</i> , rich scarlet flowers in clusters, quite hardy; in established pots. | per doz. 7s. 6d. & 10s. 6d.; 9d. 1s. & 1 6 |
| 1352 * " <i>tuberosum</i> , yellow and red, very distinct, quite hardy. Plant in Spring, p. doz 3s. 6d. 0 4 | |
| These <i>Tropæolums</i> are all beautiful climbers. <i>Azureum</i> , <i>brachyceras</i> , and <i>Jarratti</i> , are recommended for greenhouse for trailing over trellises, round pillars, etc. <i>Pentaphyllum</i> is a fine climber for warm sunny situations out-doors. <i>Polyphyllum</i> revels on a sunny rockwork. <i>Tuberosum</i> requires an open situation and poor soil, and should be trailed over branches, etc., placed on the ground. The tubers should be kept dry during winter and planted in Spring. <i>Speciosum</i> is one of the most lovely and hardy climbers, and succeeds in a cool, rather moist situation, away from the sun. | |
| 1353 * <i>Tuberose</i> , Double American Dwarf, "Excelsior Pearl"; much prized, being comparatively dwarf, flowers pure white and double; fine forcing roots, ready in January | p. 100, 30/-; p. doz. 4/- 0 6 |
| 1354 * " " Extra Early (African roots), flowers pure white, very double; fine roots, ready end of October | per 100, 25s.; per doz. 4s. 6d. 0 6 |
| CULTURAL TREATMENT FOR FORCED FLOWERS.—The growers for Covent Garden pot the <i>Tuberose</i> singly in 5 or 6-inch pots, and plunge in moist bottom heat, withholding water till the foliage appears, then giving it freely, growing on in a house with a high temperature and a moist atmosphere, till the flower buds develop; at this stage, if the plants are for the conservatory or sitting-room, remove to a greenhouse temperature. The bulbs for early flowering pot as soon as they can be procured, and plunge the pots in a temperature of about 60 degrees. The bulbs for succession keep dry or pot at once, to make root growth; in either case the temperature should not be below 50 degrees. | |
| 1355 <i>Ureolina pendula</i> (syn. <i>aurea</i>), a splendid warm-house bulb, with large golden-yellow flowers, tipped with rich green, and produced in graceful drooping terminal clusters | 7 6 |
| 1356 <i>Uropetalum hyacinthoides</i> , rose, $\frac{1}{2}$ ft. } The flower spikes of these rare bulbs { per doz. 4s. 6d. 0 6 | |
| 1357 " <i>viride</i> , green, $\frac{1}{2}$ ft. } are extremely pretty. { , 4s. 6d. 0 6 | |
| 1358 <i>Watsonia</i> , 6 in 6 named vars. 2/- } The <i>Watsonia</i> is very ornamental and showy; { | |
| 1359 " mixed varieties } requires same cultural treatment as the <i>Gladiolus</i> . { p. doz. 3s. 6d. 0 6 | |
| 1360 <i>Zephyranthes Andersoni</i> (Habranthus), flowers brown and gold, $\frac{1}{2}$ ft. | |
| 1361 " <i>atamasco</i> , large pure white flowers, nearly 3 ins. long, ht. $\frac{1}{2}$ ft. | per doz. 9/- ... 1 0 |
| 1362 " <i>candida</i> (Flower of the West Wind), charming white crocus-like flowers, produced in Autumn, ht. 1 ft. | per 100, 12/- 2/- ... 2 6 |
| 1363 " <i>carinata</i> , beautiful full rose, large handsome flowers, ht. 1 ft. | per doz. 15/- ... 1 0 |
| 1364 " <i>Treatæ</i> , beautiful lily-white fragrant flowers, ht. 1 ft. | per doz. 15/- ... 2 6 |
| These Swamp Lilies are a beautiful family of bulbous plants. <i>Z. Candida</i> (The Flower of the West Wind) is quite hardy, and flowers in Autumn, and in tufts and masses its beautiful white crocus-like flowers produce a beautiful effect. <i>Z. atamasco</i> , <i>carinata</i> , and <i>Treatæ</i> require greenhouse culture, or may be grown under a south wall. <i>Z. Andersoni</i> makes a charming pot-plant, several bulbs in a pot. These four latter flower in early Summer. | |
